

carbon composites are becoming competitive ... - it services - 1. introduction composites have been widely used across industries like aerospace, wind energy, automotive, industrial, marine, oil and gas. advanced carbon fiber composites **copper metgraf**, **carbon composites for printed circuit board ...** - new materials must offer: higher thermal conductivity -- especially in the z axis reduced thickness reduced weight adapt directly to existing printed circuit board manufacturing processes. a single material solution that can be integrated within a pcb would be a benefit when multiple requirements are needed. mmcc is now producing copper-graphite composite thermal cores:
